

# *Experience the benefits of a quality Montessori education*

KBM is among an elite group within the Montessori educational community in North America with its combination of Montessori academic disciplines and a programme for the performing arts.  
*For children ages 3-6.*

**King's Bridge Montessori** is incomparably beautiful. The main school building is more than a century old and complements the method of education which began in Europe in 1907 by its founder Dr. Maria Montessori. The holistic, child-centered approach covers five areas of study: Practical Life, Sensorial Awareness, Math, Language and Cultural Studies (geography, history, science, zoology and botany).

Montessori academic disciplines are combined with weekly violin, piano, musical theatre and ballet classes to enhance the enjoyment of knowledge and an appreciation of the arts.

At KBM we strive to nurture character, independence and an appreciation of the arts through helping all of our students acquire the tools needed to pursue a lifelong love of learning.

**Directress Cindy Walsh** earned both primary and elementary Montessori certifications from the MACTE accredited Toronto Montessori Institute in 1997. She taught at one of the largest, most prestigious Montessori Schools in North America, the Toronto Montessori School (TMS). Ms. Walsh also owned and directed the Montessori Children's House of Claremont, Ontario. Her enthusiasm and passion for teaching pervades King's Bridge Montessori making a winning combination that promotes learning.

*“Help me to do it myself”*
